

## SAHANACAMP @ ISCRAM VIETNAM

### PREPAREDNESS

## Community Resilience Mapping

---

**Site:** <http://test.lacrmr.sahanafoundation.org>

**Login:** Not required

**Background:**

This is a system for Coalitions of Organizations in Los Angeles to improve the resilience of their communities. It is sponsored by Los Angeles County Public Health.

### ***Mapping Vulnerable Groups***

*With Sahana you can identify areas with vulnerable populations and find nearby places that can serve those populations*

1. Select 'Make a Map'
2. Show a coalition and zoom into it eg *Huntington Park*
3. Show a Census Data layer on the map for a group of vulnerable people eg *people over 65 living alone*
4. Show a type of place to engage eg *Social Services places*
5. Find a nearby place that could engage with these vulnerable people

### ***Mapping Hazards***

*With Sahana you can identify areas at risk from hazards and identify places which could be affected by these hazards.*

1. Reload the Map page to clear all selections
  2. Choose a type of hazard map data to show eg *Landslide Susceptibility*
  3. Zoom into a Coalition at risk from this hazard eg *Pomona*
  4. Show some places in that area eg *Health and Mental Health places*
  5. Identify a place that the coalition can engage to ensure that they are aware of any risks and to take appropriate steps to mitigate them.
  6. Is this useful? How could it be improved?
