

SAHANACAMP @ ISCRAM VIETNAM

RESPONSE

Requests

Site: <http://rmsdev.aidiq.com>

Login: user@example.com

Password: user

Background:

Sahana includes a flexible Logistics system to manage Inventory in Warehouses and other Sites, such as Offices, Hospitals & Shelters.

Sites can make Requests for Items they need & see which other Sites have suitable stock.

Make a Request

Request Items that you need for your response.

1. Open the Warehouses module
2. Create a new Request
3. Select some Items for the Request *e.g. Blankets*

Fulfil Request

Send Items to the people in need.

1. Open a Warehouse *e.g. National Warehouse*
 2. Open the Match Requests tab to see Requested Items
 3. Check if you can match a Request & then Send
 4. Open the Waybill form to be able to print out a paper trail
 5. Send Shipment
