

Sahana Eden Simulation Instructions

- Review the Incident Reports to gain an understanding of the Disaster Situation
- Army Helicopters are providing transportation to NGO Field Teams to Assess Incidents which have been assigned to that NGO
- Assessments can be created from the Incidents Reports
- Assume that there are 4 people per Household.
- The Gap Map can be used to visualise response needs
- The Gap Report can be used to plan response activities. Consider the advantages and disadvantages to working in similar geographical area vs. working in a single Cluster.
- Request Items needed to support activities
